On Going Projects of Excelize

The on going projects include: BIM for a high rise tower in Mumbai with the challenges of scheduling the weekly BOQ for proper just in time material procurement.

BIM again is being worked for a multi purpose utility building with different services in action. Along with this giving simulation for the proper scheduling of the construction.

BIM for an international HVAC company specialized also in fire fighting systems has gone into their product modeling with parametric specification in Revit for their products applications into construction industry.

Excelize has also started modeling town plans for an European company.

In present services Excelize is also working for projects in Northern India for IT Parks, Mall's, Retail joints and residential and commercial complexes. These work involves extensive modeling, for design validation, clash detection-resolution, BOQs structural schedules and other such design coordination work.

CMD Pratap Dhopte Attends CITYSCAPE Abu Dhabi

Cityscape Abu Dhabi 2011 ended on a high note, following four days of debate, discussion and announcements from the regional and international real estate industry. The show floor were a hive of activity, with several large-scale announcements made, all of which reflected the developing market place in the region and the shift in focus for developers.

Also Director Sonal Dhopte visited The Sleep Event India 2011 at Westin Mumbai.

Comments on BIM use

"We are truly a production home builder, and we were getting plan sets that were 3 inches thick," says Alan Shapiro, president of Winchester. "Now, thanks to BIM, we get one house-specific set that is tailored to that particular house."

"Shapiro says the big savings come from construction errors caught during the design phase. More accurate drawings for houses also lessen the time a design takes to get to market. Shapiro says Winchester's use of virtual prototyping has resulted in much lower mock-up and in-the-field prototype costs."

Dear Readers,

This summer brings in hot assignments to construction industry with big projects. With ever growing challenges BIM comes in handy for this industry. Bringing you this month some direct benefits to industry through BIM and comments from industry.

The Buzzzzz...

5 Ways Builders Can Benefit from BIM

Customization — Builders can offer the design flexibility and options of a custom home at the cost of a product home.

Clash detection — Using a 3D model, builders can check for structural, mechanical, and plumbing system clashes and design errors upfront, eliminating costly construction changes on site.

Staff efficiencies — For instance, Oakwood Homes sells nearly 400 homes annually with just handful of people.

Site-specific plans — Once the base BIM models are created for each home a builder offers, creating fully detailed, site-specific plans is a simply process, providing accurate material counts and design specifications.

Marketing — Using BIM, builders can create robust, detailed 3D renderings and walkthroughs on the fly to better market homes and keep customers updated on their home.

Upcoming events:

1. ALUVI is an exclusive event where the exhibitors will be able to show new solutions for Aluminium and glass. Buenos Aires, Argentina 31 May - 04 Jun 2011
2. Prefabrication and Modular Construction for Offshore Projects June 01, 2011 * Renaissance Tianjin Teda Convention Centre Hotel, Tianjin, China
3. Roof India 2011: 27—29 May 2011 Bombay Exhibition Center Mumbai India.
